Informatica
security

information

represents over 80% of global economic value. data storage demand doubles each year while information security has become a strategy for business survival.

customers now demand verifiable privacy. regulatory bodies expect auditable compliance efforts. information asset protection is now a big business priority.

for over 15 years, Informatica has earned trust by helping clients to control risk specifically by providing solutions for:

- » prevention
- » verification
- » remediation

protection

from the inside out coupled with top-down security is our proven recipe for information protection. our clear, actionable strategies validate security investments and deliver quantifiable results.

our dedication to service quality is what sets Informatica apart. we pioneered recurring audits, security awareness certification and our own standards-based risk management process.

our services include:

- » fixed-price consulting
- » modular risk management
- » employee certification

corporate governance challenges such as compliance, strategy, risk planning and the need for deep visibility are addressed by professionals with a vast knowledge of operations, audit, incident & project management, continuity and diverse technology.
